

How Does it Work

1. **Share Your Data Collection PDF**

Start by sharing the PDF that outlines the data you want to collect. This helps us understand your specific requirements and set up the system accordingly.

2. **Get Access to the Dashboard**

You will be granted access to our intuitive dashboard, where you can manage all aspects of the data collection process. Monitor progress, review collected data, and make necessary adjustments in real-time.

3. **App Setup with PIN for Data Collectors**

We will provide an app equipped with a secure PIN for your data collectors. This ensures that only authorized personnel can access and use the app for data collection.

4. **Collect Data**

Your data collectors use the app to gather information in the field. Whether they are online or offline, the data is securely stored and transmitted once connectivity is available.

5. **Download Collected Data**

Easily download all collected data as a CSV file from the dashboard. This format is perfect for further analysis and integration with other tools you may use.

If you want help to setup, call +265994661001 or email chawerkamanga@gmail.com to help you onboard.
